

FROM EDITORS

Dear Readers,

With great pleasure we invite You to get acquainted with the new issue of Archives of Psychiatry and Psychotherapy. This time special attention is paid to the emotional states and processes of patients suffering from mental disorders and of their family members. Published in this issue papers reflect the current intensive development of social psychiatry, presented recently in many publications worldwide [e.g.1-7].

We send to all our Readers the best Season's Greetings!

At the end of the year we would also like to express our special gratitude to all Authors and Reviewers for their engagement in the creation of our journal.

Editorial team
